

## Onboarding Programs

- ✓ Get up and running with your hardware and software quickly
- ✓ Small groups to ensure everyone gets the most out of the training
- ✓ Sessions delivered by expert Brain Products Academy trainers
- ✓ Comprehensive training material included in onboarding fee

## Contents of Analyzer Onboarding

*(3.5-hour online training)*

- ✓ Introduction to BrainVision Analyzer: Software user interface and functionalities
- ✓ Importing datasets
- ✓ Data handling: Exploring and visualizing data in Analyzer
- ✓ Automation of processing pipelines
- ✓ Data exports and measure extraction
- ✓ Hands-on session: Creation of an example processing pipeline based on ERP analysis

## Contents of EEG-fMRI Onboarding

*(8-hour on-site training)*

- ✓ Technical background of EEG-fMRI and the BrainAmp MR (EEG / ExG) amplifier series
- ✓ Safety considerations for EEG-fMRI
- ✓ Installation of the BrainAmp MR (plus) system at the scanner
- ✓ Pilot measurement and setup optimization
- ✓ Scanner-related artifacts: Theoretical background and how to identify them
- ✓ Correcting scanner related artifacts in the BrainVision Analyzer software

 [Contact academy@brainproducts.com](mailto:academy@brainproducts.com) to learn more!

- ✓ Sharing the knowledge and experience of our expert team of scientists
- ✓ Delivering resources to support your learning journey
- ✓ Providing a hub for your training and education needs
- ✓ Helping you acquire the knowledge and skills to accelerate your research

## What does the Brain Products Academy offer?

### Dedication to teaching and learning

The Brain Products Academy brings together all aspects of our training and education activities – from short written tutorials to on-site workshops and a whole host of exciting content in between. The Brain Products Academy delivers the same quality and expertise that you have come to expect from Brain Products.

### Education events and services

We provide opportunities for you to acquire new knowledge and develop your skills. We want to support you on your research and learning journey. To do this we offer a variety of content and services for beginners through to experts on many aspects of neurophysiological research.

### Community and networking

Our events provide the opportunity to meet like-minded researchers and share ideas. Discussing your research with others is a valuable opportunity and informal networking is encouraged at all of our events.

- ✓ Webinars, workshops, tutorials and more
- ✓ High-quality educational materials
- ✓ Delivered by our team of knowledgeable, skilled scientists
- ✓ Regular new content covering a variety of neurophysiological topics

## Our Events

- ✓ All Academy events offer the highest standard of content, teaching, and supporting materials
- ✓ We offer a variety of events from 1-hour webinars to multi-day on-site workshops
- ✓ Topics include:
  - Data processing with the Analyzer software
  - A-Z of EEG (data acquisition and data analysis)
  - EEG-fMRI
  - EEG-TMS
  - Careers and professional development

## What can you expect?

- ✓ Learn from our expert team of scientists and our network of collaborating researchers
- ✓ Ask questions directly to our experts, helping you progress with your learning and get the input you need
- ✓ The opportunity to expand your network and discuss your ideas with like-minded scientists, especially at our on-site events

## How to find out about our events

- ✓ Sign up for our events newsletter: [www.brainproducts.com/event-alert](http://www.brainproducts.com/event-alert)
- ✓ Check out the Academy page on our website: [www.brainproducts.com/academy](http://www.brainproducts.com/academy)
