

Wireless Trigger for LiveAmp

Wireless Trigger transmission made easy

- ✓ Wirelessly transmits event markers to LiveAmp amplifiers
- ✓ Fast and consistent trigger transmission
- ✓ Encodes your stimulus events with 8-bit triggers
- ✓ No software configuration necessary

Wireless Trigger: Wireless recording of event markers in EEG data

- ✓ fully mobile solution for recording event markers in EEG data
- ✓ 8-bit trigger information to a compatible amplifier wirelessly
- ✓ The set consists of a transmitter and a receiver
- ✓ The transmitter is plugged into the parallel port of your PC or into the TriggerBox output. The receiver is connected to the Sensor & Trigger Extension (STE) for LiveAmp
- ✓ This solution provides the fastest and most consistent wireless trigger timing.
- ✓ With a 3 millisecond transmission delay and only one sample jitter, it has the most accurate timing that is needed for gold standard EEG data analysis
- ✓ It is the ideal companion for your mobile EEG recordings with our portable LiveAmp amplifiers
